

**REPORT FROM 5th PROJECT MEETING IN GLASGOW,
SCOTLAND, UK
THURSDAY 2nd JUNE 2022**

On Thursday was the Queen's Jubilee and the school was closed, so **a sporting activity was planned - a day's cycling on the island of Great Cumbrae in the Firth of Clyde.** We met at the school at 9.30 a.m., where a bus was waiting to take us to **the town**

of Largs to catch the ferry to Great Cumbrae island.

The journey took about an hour and then we disembarked at **the harbour** and boarded the ferry which only took about 20 minutes. There was a bus stop on the island which took us to **the town of Millport.** Here we had arranged for bikes at the rental shop, and we gradually chose our size and got a helmet. Our plan was **to ride around the island, which was about 20 km.** The weather was nice, **the sun was shining** and the route was on a tarmac road around the whole island practically on flat ground. We **made a few stops for lunch,** which we had packed with us, and beautiful views of the sea.

The other group that didn't want to bike **went on a hike through the middle of the island to the top and back about 8 km along a hiking trail.** Along the way there was an interesting **old hospital, a church, the narrowest house in Scotland and farms.** All along the route there were beautiful views of the sea as the island was not very big. **From the top you could look out in all directions.** It was a lovely quiet place.

After returning to Millport after 3 hours, **we had ice cream,** snacks, walked around the quaint little town, and then met at the bus stop to take us back to the ferry. We crossed back to Largs and left at

5.00 p.m. for Glasgow, **arriving there at about 6.00 p.m.** It took us an hour from the school to the hotel and as we were tired we bought a baguette and went to rest.
