

**REPORT FROM 6th PROJECT MEETING IN QUIMPER,
FRANCE
WEDNESDAY 22nd JUNE 2022**

The meeting was early in the morning in front of Le Likés school. A tour of the old part of Quimper was planned.

The first stop with our whole group was in a **nearby exotic garden**. Everyone could walk and see the garden on his own. It took about half an hour. There were pal trees and many exotic plants and flowers. It was a very pleasant place to relax.

Then we continued to **the historical part of the city**. We were in the places where the old university was and now there is also a new one, the building looked like a church. The name of the city comes from the Breton term "kemper", which means confluence. **The rivers Steir and Odet flow in the city**. Those streets are in the Breton language, **the Breton language is a dialect based on Celtic language**.

There were not only monuments on the tour, but also live donkeys on the streets. The interesting thing was that he finds a street on the wall of **the house with signs of how much water there was during the flood**. We saw the **Cathedral of Saint Corentin** in the square. It is the most important and largest cathedral. There are also many other churches in Quimper.

This was followed by a visit to the **Breton Museum of Fine Arts**. We went there with a guide who was explaining all in English. We saw traditional costumes,

ceramics, archeological findings, pictures and many other things. We learned about the past of the city. There were a lot of clothes, tools and

things. The building was like a maze – we got lost in this museum

We went back to school for lunch a a little of rest. In the afternoon, after lunch we returned back to the cathedral entrance. We were ready for **the game in international teams**

about the city sights. It was prepared for us by some volunteer university students on Erasmus from foreign countries. **Teachers also made two teams and played with us.** Each team got four papers with photos of some signs, statues, parts of the buildings, windows or similar things in the city. We were supposed to find all of them and took a photo of all. There were also some sentences, one for each picture that we had to complete after we found a place and some little hints. It took for about two hours, we were running through city, some places were easier to find and some were more difficult.

In my team we did great and won this game.

This day we got to know Quimper through the interesting and funny game.
